Featured Job – Metal Locking Service was contracted for an I-R compressor repair for a utility company located in Ghent, Kentucky. A piston was thrown through the side of the block resulting in significant damage. Repairs included:

- Prefabrication of a side wall
- On-site metal locking of side wall and top cover
- Laser alignment of main bore
- Logistics
 - Shipping multiple work crews and equipment required on-site with staggered start and completion dates
- Customer required safety training
 - EON-U.S. Passport/Contractor Safety
 - Hazard Analysis Training
 - Hazard Mitigation Plan
 - Ammonia Awareness Training

Laser alignment of I-R compressor

New Additions – MLS is excited to announce that we have completed the purchase and acquisition of a neighboring property. This will bring our total manufacturing floor space to over 50,000 square feet. Attributes of the new facility include: 800 amps of electrical service (was previously a CNC machine shop), crane service and additional office space. The facility has undergone a major facelift with exterior painting, a full office remodel, a fiber optic T-1 installation and VOIP phone system.
