Featured Job - Twenty years of service resulted in significant erosion to the sealing surfaces of 10 flanges on 2 separate decompression chambers (see right) for the Mumbai, India based diving vessel Seamec III. Two field machinists along with our Lloyds of London qualified welder were sent to the Willemstad, Curacao dry-dock for repairs. Stainless steel weld build up along with facing and o-ring groove cutting were completed on-time and on-budget (pictured below).

Decompression chamber – flange facing

Entry locks on diving vessel

Company Sponsor – Metal Locking was proud to co-sponsor Matt Sphar in the 2008 Bassmaster Elite Series. The event was held in Lake Erie, beginning July 31. Matt is the only Elite series fisherman from New York State.

New Additions – Designing our second website, www.portablemachining.com, gave us an opportunity to reflect on all that we do. The new site highlights our field machining capabilities, as well as equipment repair, welding, laser alignment and diamond wire cutting. Project descriptions are provided for recent international jobs in Curacao and Panama, as well as several domestic jobs. Continue to check back as we update our map on our About Us page of our latest travels.

**Metal Locking Service/MLS Machine Shop
launch new websites**

Out and About – Metal Locking will be exhibiting at the **TurboMachinery Symposium** September 9 – 11 in Houston, TX. We can be found at booth # 855. And with the cold winter ahead, we had no problem deciding to exhibit at the **Power-Gen International** this December, being hosted in Orlando, FL.
